

Department/Service: Hyperbaric Oxygen Therapy

Job Type: PRN-as needed Hyperbaric Chamber Operator

Location: Indianapolis, Indiana

Qualifications:

- Minimum education level of High School diploma or equivalent.
- Emergency Medical Technician/Paramedic or equivalent with certification in good standing. Previous experience as a Physician Assistant or Active Duty Military Corpsman will be considered.
- Candidate must have at least one year experience in a patientcare environment.
- Current BLS certification or ability to acquire such certification in a reasonable period of time.

Job Description: Under the direction of the Program Director, Clinical Manager, and Medical Director, the individual in this position will act as the outside attendant and control operator during clinical treatment using monoplace hyperbaric chambers. The individual accepts responsibility and accountability for working within the framework of appropriate regulatory body where it applies and follows all Outpatient Integrated Strategies (OIS) and affiliate hospital policies and procedures. The individual will comply with hospital and nursing philosophy and standards while performing job duties and responsibilities and will demonstrate competence in these essential functions through the ability to perform functions including, but not limited to, the common examples listed.

Salary: Dependent on experience and qualifications
